

Unitrends Endpoint Backup Release Notes

Release 1.26 | Document Version 1.06172022

What's new in release 1.26

This document describes new features introduced in release 1.26.

To upgrade to release 1.26, install the latest agent on all protected assets (see [Install the Endpoint Backup agent](#) in the [Endpoint Backup Guide](#)).

Endpoint Backup agent

This release includes agent version 1.26. Unitrends recommends upgrading to the latest agent version to benefit from fixes, new features, and performance enhancements.

Cooper Insights in KaseyaOne

The Cooper Intelligence Engine provides insights based on telemetry gathered from your module usage. These insights are designed to help you get the most out of your Kaseya modules. Insights let you know about features that drive the most value for your business and guide you toward following industry leading best practices.

To receive insights from Endpoint Backup, your Endpoint Backup and KaseyaOne user accounts must be linked. If you are using the *Login with IT Complete* single sign-on feature, you're all set. If not, run the [To enable login with IT Complete](#) procedure in the [Endpoint Backup Guide](#) to set up single sign-on.

For more on KaseyaOne and Cooper Insights, see [KaseyaOne](#) and [FAQs - Cooper Intelligence Engine](#).

Haven't used KaseyaOne? It's free! Contact Support to get started.

Initial insight details

This Endpoint Backup release includes these insights:

Insight Name	Summary	Triggers	Excludes
Recovery drills	Complete recovery testing at all your customer sites	No restores in > 90 days for a given customer	Insight does not apply to: <ul style="list-style-type: none"> • Disabled customers • Disabled assets • Systems without valid backups
Backup coverage	Ensure backups are configured and running on all systems	Asset has agent installed but is not part of a job. Not taking backups.	Insight does not apply to: <ul style="list-style-type: none"> • Disabled customers • Disabled assets • Deleted/decommissioned assets • Recently installed assets (< 7 days)

Our goal with these initial insights is to:

- Ensure that your assets are always protected.
- Ensure that you are adhering to industry best practices by conducting recovery tests for all the organizations you support.

These insights are just the beginning — stay tuned for more Endpoint Backup insights in upcoming releases!

Working with Cooper Insights in KaseyaOne

To view and manage insights:

- 1 Log in to KaseyaOne and select **Cooper**.
- 2 Active insights display in the To Do list.

The screenshot shows the KaseyaOne dashboard for user Cooper. The dashboard is divided into three main sections:

- Scoreboard:** A circular progress indicator shows 53% completion with the text "Keep it up!". A legend indicates "Completed" (blue) and "Remaining" (grey).
- Your Insights:** A section with four insights:
 - You need to test your backups!**: It's been 90 days since you've completed recovery testing for some of your organizations. Action: [EndPoint Backup](#).
 - Careful! Backups aren't configured to run on some of your endpoints.**: You are not fully protected. You've installed agents but until they are added to a job, critical data is left unprotected. Action: [EndPoint Backup](#).
 - Maximize training engagement with 'Custom Domains'**: The new BullPhish ID custom domains functionality is a highly requested feature that will allow you to use your own domain or your customers' domain as a sending domain for security awareness training campaign emails, thereby improving campaign deliverability to end users. With this feature enablement... Action: [BullPhish ID](#).
 - Stop the Manual Report Generation Madness! Let Network Detective Pro's automation do the work!**: Your Network Detective Pro subscription includes a powerful Report Automation Server (we call it Reporter, for short), that's designed to save you a ton of time when it comes to generating reports on a recurring basis. You decide what reports to generate, how frequently you want them generated, and even...
- Table of Modules and Completion:**

Module	Completed
Passly	0/2
myITProcess	0/3
Compliance Manager	5/5
Network Detective Pro	0/4
VulScan	3/4
Spanning Google Workspace	2/2
Spanning Microsoft 365	2/2
Cooper	0/4
BullPhish ID	1/2
VSA	3/4
Graphus	2/2
EndPoint Backup	0/2

3 Click an Endpoint Backup insight.

4 Review insight details. Do one of the following:

- Click the action button to address the insight (*Jump to the Endpoint Backup recovery page in our example*).

OR

- Click **Skip For Now** to move the insight to the Archived list.

Notes:

- To address the recovery drills insight, run one test recovery for each of the customers listed in the insight details (customers *Good Burger* and *Miami Specialist Lab* in our example).
- To address the backup coverage insight, run backups for each of the assets listed in the insight details.
- You can also opt to disable customers, disable assets, or delete/decommission assets to remove them from the insight.

- 5 When the insight condition is resolved, the insight moves to the Completed list.

Enhancements and fixes

- Login with IT Complete – Minor improvements to the single sign-on flow.
- Dashboard – Performance improvements to the Dashboard.
- Backup > Jobs > New Job and Edit Job – Improved sorting/filtering and added new labels to the asset selector (used to select assets to include in a job).
- Backup Status > List View – Improved transfer rate and progress reporting on the page.
- Backup Status > History – Fixed an issue that prevented the History View from displaying when viewing All Customers.
